SECTION III: RISK FACTORS

An investment in our Equity Shares involves a high degree of financial risk. Prospective investors should carefully consider all the information in the Draft Red Herring Prospectus, particularly the “**Financial Information of the Company**” and the related notes, “**Our Business**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” on page 161, 109 and 195 respectively of this Draft Red Herring Prospectus and the risks and uncertainties described below, before making a decision to invest in our Equity Shares.

The risk factors set forth below are not exhaustive and do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, individually or together, could adversely affect our business, financial condition, results of operations or prospects, which could result in a decline in the value of our Equity Shares and the loss of all or part of your investment in our Equity Shares. While we have described the risks and uncertainties that our management believes are material, these risks and uncertainties may not be the only risks and uncertainties we face. Additional risks and uncertainties, including those we currently are not aware of or deem immaterial, may also have an adverse effect on our business, results of operations, financial condition and prospects.

This Draft Red Herring Prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Draft Red Herring Prospectus. The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors below. However, there are risk factors the potential effects of which are not quantifiable and therefore no quantification has been provided with respect to such risk factors. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Issue, including the merits and the risks involved. You should not invest in this Issue unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the particular consequences to you of an investment in our Equity Shares.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some events may not be material individually but may be found material collectively.
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material at present but may be having material impact in future.

Note:

The risk factors as envisaged by the management along with the proposals to address the risk if any. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial implication of any of the risks described in this section.

In this Draft Red Herring Prospectus, any discrepancies in any table between total and the sums of the amount listed are due to rounding off. Any percentage amounts, as set forth in “**Risk Factors**” on page 25 and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” on page 195 of this Draft Red Herring Prospectus unless otherwise indicated, has been calculated on the basis of the amount disclosed in the “**Restated Financial Statements**”.

INTERNAL RISK FACTORS

1. **Our Company, Directors and Promoters are parties to certain legal proceedings. Any adverse decision in such proceedings may have a material adverse effect on our business, result of operations and financial conditions.**

Our Company, Directors and Promoters are parties to certain legal proceedings which are pending at different levels of adjudication before competent authority. We cannot assure you that these proceedings will be decided in our favour. Further, there is no assurance that similar proceedings will not be initiated against us, our Directors or Promoters in the future. Any adverse outcome in any of the below mentioned proceedings could have an adverse effect on our reputation and may affect our future business, prospects, financial condition and results of operations. It may further divert the attention of our management and promoters and waste our corporate resources. For details of these proceedings, see “**Outstanding Litigation and Material Developments**” on beginning from page 203 of this Draft Red Herring Prospectus. A classification of these legal and other proceedings is given below:

Outstanding Litigation	Number of Matter	Financial Implications to the Extent Quantifiable
Company:		
Criminal proceedings filed by the Company	1	Not ascertainable
Other pending material litigations against the Company	9	290.24 (to the extent ascertainable)
Other pending material litigations against the Company	2	2.10
Promoters and Directors:		
Criminal proceedings filed against the Promoters and Directors	5	Not ascertainable
Claims related to Direct Tax	14	5.24

*Amount mentioned to the extent quantifiable. The amount may be subject to additional interest/other charges being levied by the concerned authorities which are unascertainable as on date of this Draft Red Herring Prospectus.

2. We do not hold, or may not be able to prove that we hold, good title to the leasehold land situated at Ranguni, Dhanbad on which our cancer hospital and educational institute building has been constructed.

Our Company is involved in certain litigations which is related to the title of the land on which our cancer hospital and educational institute building is being constructed. The litigation relates to the land acquired by our Company admeasuring 9.55 acres from Jharkhand Industrial Area Development Authority on long term lease basis for 30 years. The said allotted land was a part of the disputed land and certain parties have alleged that the land does not belong to the State of Jharkhand / Jharkhand Industrial Area Development Authority and hence the said land cannot be leased out to our Company. The High Court of Jharkhand vide its Order dated 30.06.2022 has observed that the state had no title to transfer by lease these plots to the Company. Whereas, the Company is free to make a claim according to law against the State. The State is also free to acquire the land according to law. In the said order the High Court has directed the matter to be remanded to the Court below for passing order on the petition of both the sides that culminated in the impugned order dated 05.06.2014. The resolution of the said litigation as mentioned above is subject to legal uncertainties. Legal disputes in respect of land title can take several years and considerable expense, management time and attention to resolve as they become the subject of court proceedings. If any new developments arise in this matter, such as any rulings against us by appellate courts, we may need to write off the certain assets relating to building construction and other assets that could adversely impact our financial statements. Further, an adverse outcome in any of these proceedings may affect our reputation, standing and future business, which could have an adverse effect on our business, prospects, financial condition and results of operations. For further details of outstanding litigation in relation to the title of our land parcels, see **“Outstanding Litigation and Material Developments”** on page 203.

3. We are highly dependent on our healthcare professionals, including doctors, nurses that we engage on a consultancy basis, and our business and financial results could be impacted if we are not able to attract and retain such healthcare professionals.

Our operations depend on the efforts, ability and experience of our healthcare professionals, including our doctors, nurses, consultants and other medical staff at our hospital. A majority of our doctors are not our employees. As on May 31, 2023, we had 70 doctors of whom 42 doctors were Full Time Doctors and 28 doctors were Visiting Doctors. Our performance and the execution of our business strategies depend substantially on our ability to attract, recruit and retain leading healthcare professionals in a particular specialty or in a region relevant to our growth plans. We compete with other healthcare services providers in recruiting and retaining trained healthcare professionals, which are in shortage in the market.

Factors that healthcare professionals consider important before deciding where they will work include emoluments and incentives, reputation of the healthcare establishment, quality of the facilities, academic and research opportunities, and a sufficient number of patients and surgeries made available to them. There can be no assurance that healthcare professionals will conclude that we compare favourably with other healthcare service providers on these factors. We seek to attract healthcare professionals who has large patient bases and referral networks, and it may be difficult to negotiate favourable terms and arrangements with these professionals. We typically agree to pay our specialist physicians a professional fee based on the services they provide. Depending on market conditions and scarcity of the trained professionals, we may have to increase the fees and salaries (as applicable) paid to our healthcare professionals and consultants, and there would be no assurance that we will be able to control such expenses completely as planned. If we are unable to make payments to these consultants or other healthcare professionals on time, or if our relationship with them deteriorates, or these professionals receive better opportunities with other healthcare service providers, we may be unable to retain them.

Failure to attract and retain sufficient qualified healthcare professionals for our hospital could adversely affect our business, financial condition, results of operations, cash flows and prospects. Certain patients choose our hospital because of the reputation of some of our individual doctors. If we fail to retain these key doctors, we may not be able to attract such patients, which may have an adverse impact on the patient volume and our profitability at such locations.

There is no assurance that our consultant doctors will continue to provide services to us or devote the whole of their time to our hospital. We may, as a result, be unable to effectively utilize their time and expertise in providing services to our patients. These arrangements may also give rise to conflicts of interest, including with regard to how these doctors allocate their time and other resources between our hospital and other clinics or hospitals at which they work and where doctors refer patients. Such conflicts may prevent us from providing a high quality of service at our hospital and adversely affect the level of our patient intake which may have an impact on our business, results of operations and cash flows.

Our performance also depends on our ability to identify, attract and retain other healthcare professionals, including nurses. We have experienced, and expect to continue to experience pressure to increase wages and other benefits, due to a general shortage of qualified nurses and paramedical staff in India.

As a multi-specialty hospital operator, we must attract and retain qualified healthcare professionals in a wide range of specialty areas, and there may be fewer qualified professionals and competition for these individuals in a particular specialty area at the time when our staffing needs arise. We may also face heightened challenges in attracting sophisticated and efficient healthcare professionals at peripheral units, as healthcare professionals usually prefer to settle down in major cities and metropolitan areas. We may experience a slower-than-usual growth rate in peripheral units due to the lack of qualified healthcare professionals.

If we are unable to attract or retain healthcare professionals as required, we may not be able to maintain the quality of our services and we may have to face admissions fewer patients to our hospital, thereby having a material adverse effect on our business, financial condition, results of operations, cash flows and prospects. We may also be required to incur increased costs to retain and recruit medical personnel, which may have a material adverse effect on our business, financial condition, results of operations, cash flows and prospects.

4. Our industry is highly regulated and requires us to obtain, renew and maintain statutory and regulatory permits, accreditations, licenses and comply with applicable safety, health, environmental, labour and other governmental regulations. Any regulatory changes or violations of such rules and regulations may adversely affect our business, financial condition and results of operations.

Healthcare providers are subject to a wide variety of governmental, state and local environmental and occupational health and safety and other laws and regulations. Further, we are required to obtain and renew from time to time, a number of approvals, accreditations, licenses, registrations and permits from governmental and regulatory authorities such as in relation to establishment of hospitals, operation of our hospitals, procurement and operation of medical and other equipment, storage and sale of drugs. In particular, we are required to obtain certificate of registrations for carrying on certain of our business activities including from the Government of India, the State Governments and other such regulatory authorities that are subject to numerous conditions. For a description of the approvals and licenses obtained by us, see **“Government and Other Approvals”** on page 212. Moreover, health and safety laws and regulations in India have become increasingly stringent over time, and it is possible that they will become more stringent in the future. For detailed information in relation to the rules and regulations applicable to us, see **“Key Industry Regulations and Policies”** on page 127.

The regulatory licenses that we require are typically granted for a limited term and are subject to renewal at the end of such terms. Further, we cannot assure you that the approvals, licenses, registrations and permits issued to us would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. Any failure to renew the approvals that have expired or apply for and obtain the required approvals, licenses, registrations or permits, or any suspension or revocation of any of the approvals, licenses, registrations and permits that have been or may be issued to us, may impede our operations and may have an adverse effect on our business, financial condition and results of operations. For a description of the pending approvals and licenses, see **“Government and Other Approvals”** on page 212.

We also maintain certain accreditations, including accreditations from the National Accreditation Board for Hospitals and Healthcare Providers (“NABH”) for our hospital, accreditations from National Accreditation Board for Testing and Calibration Laboratories (“NABL”) for our laboratory. Our NABH accreditation has been expired on March 02, 2023 and the same has been applied by us for renewal. If we lose current accreditations or fail to renew such re-accreditations of our hospital by NABH, NABL and other agencies, or if we fail to obtain additional accreditations for our hospitals, our reputation, business operations could be adversely affected. Furthermore, in the event certain accreditations are made compulsory, either by law or as a condition for empanelment, our business, financial condition, results of operations and cash flows as we may not be able to obtain such accreditation in a timely manner, or at all.

In addition, as we are in process to start a new cancer hospital and educational institute, we will need to obtain additional approvals or licenses that are required to operate such hospital and institute respectively. If we fail to obtain or renew any applicable approvals, accreditations, licenses, registrations or consents in a timely manner, or at all, we may not be able to start such operations, which consequently may affect our business, cash flows or results of operations. For details of pending approvals, please refer to chapter titled **“Government and other Statutory Approvals”** on page 212 of this DRHP.

Further, if we fail to comply with the requirements for applicable quality standards, or if we are otherwise unable to obtain or renew such quality accreditations in the future, in a timely manner, or at all, our business and prospects may be adversely affected. The qualifications and practice of our healthcare professionals is also strictly regulated by applicable laws, regulations, policies and guidelines, as well as by applicable codes of professional conduct or ethics. If our healthcare professionals fail to comply with applicable laws, regulations, policies or guidelines, they and/or we may be subject to penalties including fines, loss of licenses or restrictions on our healthcare facilities and operations, which could materially and adversely affect our business and reputation.

We may incur substantial costs in order to comply with current or future laws, rules and regulations, and we may not be able to maintain, at all times, full compliance with such laws, regulations, policies and guidelines. These current or future laws, rules and regulations may also impede our operations and impact our continued growth. Any non-compliance with the applicable laws, rules and regulations may subject us to regulatory action, including penalties and other civil or criminal proceedings, which may materially and adversely affect our business, prospects and reputation. There is no assurance that we will not be subject to such actions in the future, which could materially and adversely affect our business and reputation.

5. Our ability to provide affordable healthcare depends on the maintenance of a high volume of patients, occupancy rates, managing operating & project costs and effective capital management. Any increase in such costs could adversely affect our business, financial condition and results of operations.

Our ability to provide affordable healthcare depends on our ability to maintain a high volume of patients, occupancy rates, and effectively manage capital, project costs, operating costs and capital expenditure.

Patient volume is affected by, among others, factors out of our control such as seasonal illness cycles, climate and weather conditions, and the employment status of individuals. As a result, our hospitals may experience a decrease in in-patient volume in times of an economic downturn or stagnation. Our inpatient admissions and treatment contribute significantly to our revenue, compared to our outpatient consultative care. In the event there is a decline in the number of inpatients serviced by us, our financial condition and results of operations will materially stand impacted. Set out below are details in relation to our in-patient and out-patient volume and revenue for the periods indicated:

(₹ in lakhs)

Departments	March 31, 2023	March 31, 2022	March 31, 2021
Inpatient Volume	8,036	7,503	6,864
Outpatient Volume	70,868	65,563	58,542
Revenue from Inpatients (₹ in lakhs)	6,128.13	5,093.36	4,245.96
Revenue from Outpatients (₹ in lakhs)	942.20	1,483.68	1,166.21

Our ability to effectively manage our capital is crucial to our ability to maintain our cost structure and any adverse development relating to patient volume and our operating or project cost may adversely affect our financial position and performance and require us to increase the fees charged to our patients, which may have a material adverse impact on our business, financial condition and results of operations. While we seek to manage our pricing model in light of these costs, we may not always be able to do so, including due to our fee arrangements and existing contracts, as well as regulatory restrictions.

There is no assurance that we will be able to maintain or improve our admissions and occupancy rates as compared to the increase in our total capital expenditures in the future. Any failure by us to maintain or improve our admissions or occupancy rates may result in an ineffective deployment of capital expenditure and reduced profit margins, which may have an adverse impact on our business, financial condition, and results of operations.

6. We derive a significant portion of our revenues from our tie up arrangements with Governmental organizations, insurance companies, third party administrators and corporations. The loss of any one or more of our major customers would have a material effect on our business operations and profitability.

Our revenue comes from in-patient and out-patient and through tie-up arrangements with governmental organisations, insurance companies, third party administrators and corporate entities. While our In-patient and Out patients cannot be categorised under the top ten category however based on the patients who come through Governmental organisations, insurance companies, TPA's and corporate entities under the tie-up arrangements, our top 10 customers relating to such entities contribute 37.05%, 37.02% and 37.14% of our revenues during the financial year 2022-23, 2021-22 and 2020-21 respectively. Such tie-ups/contracts are typically for a specified term and we are exposed to the consequences of early termination. If at the time of contract renewal, our negotiations fail, including due to a failure to agree on the pricing for our services, our revenues and profitability would be affected due to significant loss incurred by us. Any commercial disputes with such parties or any inability to renew these contracts on favorable terms or at all, could have a material adverse impact on our business, financial condition and results of operations.

In addition, we provide medical services under various government schemes such as (i) Central Government Health Scheme, (ii) Ayushman Bharat – Pradhan Mantri Jan Arogya Yojana (AB-PMJAY), (iii) Employees State Insurance Scheme (ESIS), (iv) Ex Servicemen Contributory Health Scheme (ECHS) etc. Government schemes are an important source of new patient

registrations and revenue for us. As a result, if the applicable tariffs specified in the agreements with government payers are revised downwards, or if the extent of coverage or limits are reduced, or if the payment terms are made longer, or if the reimbursement policies are changed in the agreements with the government payers, or if the government payers terminate their agreements with us, our number of new patient registrations will decline and our revenue and profitability could be negatively affected.

7. ***Setting up of a new cancer hospital and educational institute requires substantial capital outlay before we realize any benefits or returns on investments. We may be unsuccessful in implementing our growth plans of expansion in a timely manner or at all, which may have an adverse effect on our business, financial condition and results of operations.***

As part of our growth strategy, we are in the process of building a cancer Hospital at Ranguni, Dhanbad, Jharkhand and an educational institute focused on legal education and management, adjacent to the cancer hospital at Ranguni. We've also plans to build a Health Management and Research Institute at Ranchi, Jharkhand for which we have provisionally been allotted leased land from Ranchi Smart City Corporation Limited. For further details, please refer to the chapter titled "***Objects of the Issue***" on page 81 of this DRHP. We expect our long-term capital requirements to increase significantly to fund our intended growth and we cannot assure that we shall efficiently be able to obtain sufficient capital resources for these expansion plans. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. Any downgrade in our credit ratings could increase our borrowing costs and adversely affect our access to capital. Further, in case we decide to raise additional funds through the issuance of equity or equity-linked instruments, the interests of our shareholders may be diluted.

Further, if we decide to meet our capital requirements through debt financing, our interest obligations shall increase and we may be subject to additional restrictive covenants under our respective financing arrangements. If we are unable to raise adequate capital in a timely manner and on acceptable terms, or at all, our business, results of operations and financial condition could be adversely affected. Additionally, on account of such expansion, our finance cost, depreciation and other related expenses shall increase in the near future which can adversely impact our results of operations, cash flows and financial condition.

Our expansion plans remain subject to the potential problems and uncertainties that construction projects face including cost overruns or delays, labour shortages, increased costs of equipment or manpower, inadequate performance of the equipment and machinery installed at the premises, delays in completion, defects in design or construction, the possibility of unanticipated future regulatory restrictions, delays in receiving governmental, statutory and other regulatory approvals, incremental pre-operating expenses, environment and ecology costs and other external factors which may not be within the control of our management. There can be no assurance that our budgeted costs may be sufficient to meet our proposed capital expenditure requirements. If our actual capital expenditures significantly exceed our budgets, or even if our budgets were sufficient to cover these projects, we may not be able to achieve the intended economic benefits of these projects, which in turn may materially and adversely affect our financial condition, results of operations, cash flows, and prospects.

The proposed expansion will require us to obtain various statutory approvals or amend existing statutory approvals. There can be no assurance that we will be able to obtain these registrations and approvals including approvals in relations to power and water procurement in a timely manner or at all, which in turn may materially and adversely affect our growth prospects, financial condition, results of operations and cash flows.

Our expansion plans and business growth could also strain our managerial, operational and financial resources. Our ability to manage future growth will depend on our ability to continue to implement and improve operational, financial and management information systems on a timely basis and to attract, expand, train, motivate, retain and manage our team. We cannot assure you that our personnel, systems, procedures and controls will be adequate to support our future growth. Failure to effectively manage our expansion may lead to increased costs and reduced profitability and may adversely affect our growth prospects. Any of these factors may cause us to delay, modify or forego some or all aspects of our expansion plans.

Our return on our investment depends upon, among other things, successful implementation of our strategy, competition, demand of our products, government policies, interest rates and general economic conditions. If our return on investment does not meet our or market expectations, this could materially and adversely affect our business, cash flows, results of operations and financial condition.

8. ***If we do not receive payments on time from our payers, our business, financial condition and results of operations may be adversely affected.***

Our revenue is diversified across income streams, including insurance companies, third party administrators and corporations, self-payers and Central and State Government schemes. Our patients either pay for their medical expenses by themselves or through third party payers or through some other credit arrangements. Such third party payers include central, state and local government bodies, private and public insurers, and corporate entities that pay for medical expenses of their employees. Agreements with third party payers typically specify the services covered, the approved tariffs for each of the services and the terms of payment. Our revenue received through such third-party payers constitutes a key component of our total revenue from

operations. We are dependent on the timely payment of outstanding dues by such third-party payers and we suffer from recurring time lapses in recovering our fees and costs incurred from such third-party payers.

9. *There have been certain instances of non-compliances/ discrepancies, including with respect to certain secretarial/regulatory filings for corporate actions taken by our Company in the past. Consequently, we may be subject to regulatory actions and penalties for any such non-compliance/ discrepancies and our business, financial position and reputation may be adversely affected.*

Our company has not complied with certain statutory provisions of the Companies Act, 2013 in the past including but not limited to the details as mentioned in this risk factor. The company has not filed few ROC forms such as Form-2 for allotment of equity shares in FY 2006-07 to FY 2009-10, Form MGT-14 for approval of Board Report and Financial Statement for the FY 2015-16 to FY 2020-21 and to borrow money in the past under section 179(3)(d), 179(3)(g) of the companies Act, 2013, Form MGT-14 & Form MR-1 for appointment of Sukanti Kumar Das as Managing Director under section 117 and 196 of the Companies Act, 2013 and Form MGT-14 for alteration of main object clause of the company. In addition, there are few discrepancies noticed in some of our corporate records relating to e-forms filed with the Registrar of Companies, such as some clerical error exists in the Board resolution filed for appointment of Managing director with ROC.

Also, the share transfer deed in respect to transfer of shares of our Company before March 31, 2007 are not traceable. Accordingly, we have relied on the other corporate records maintained by the Company such as statutory registers to ascertain the information for the missing corporate records. Further, we are not in possession of certain legal case documents as mentioned in the “*Outstanding Litigation and Material Developments*” Chapter on page 203 of this DRHP. While no legal proceedings or regulatory action has been initiated against us in relation to the unavailable filings and statutory lapses as of the date of this Draft Red Herring Prospectus, we cannot assure you that such proceedings or regulatory actions will not be initiated against us in the future in relation to the missing filings and corporate records. We cannot assure you that any such proceedings will not have a material adverse effect on our financial condition or reputation.

Further, our company has not complied with certain Accounting Standards such as AS -15 (Employee Benefits), however the same have been duly complied by the company in the restated financial statements. Although, no show cause notice in respect of the above has been received by the Company till date, any penalty imposed for such non-compliance in future by any regulatory authority could affect our financial conditions to that extent.

10. *If we are unable to maintain bed occupancy rates at sufficient levels, we may not be able to generate adequate returns on our capital expenditure, could adversely affect our operating efficiencies and our profitability*

Our ability to sustain current levels of profitability and operating efficiencies depends on our ability to maintain and increase bed occupancy rates, which in turn depends on factors such as brand recognition in the communities in which we operate, our ability to attract and retain quality healthcare professionals, our ability to develop super-specialty practices and our ability to compete effectively with other hospitals and clinics. Our average bed occupancy rate was 65%, 66% and 64% in Fiscal 2023, 2022 and 2021 respectively. If we fail to maintain or improve our occupancy rates while we continue to incur significant capital expenditure, our business, financial condition, results of operations and prospects may be materially and adversely affected.

11. *We are exposed to legal claims and regulatory actions arising from the provision of healthcare services and may be subject to liabilities arising from claims of malpractice and medical negligence which could materially and adversely affect our reputation and prospects.*

We are exposed to the risk of legal claims and regulatory actions arising out of the medical services provided by us. From time to time, we may be subject to claims alleging, among other things, medical negligence by our healthcare professionals and product liability for medical devices we use, pharmaceuticals we dispense and medical and pharmaceutical products we sell in our pharmacies. We could also be the subject of complaints from patients who are dissatisfied with the quality and cost of healthcare services.

We may from time to time receive complaints from, or be involved in, disputes with our clients and patients with regard to medical services. This can be attributed to various factors, such as the negligence of medical personnel, failure of medical equipment, inaccurate results of medical tests conducted by outsourced laboratories, individual patient-specific conditions and disease complications. In addition, people may contract serious communicable diseases during their stay or visit at our facilities, which could result in significant claims for damages against us and, as a result of reports and press coverage, damage our reputation.

We rely on our healthcare professionals to make proper diagnoses, administer proper treatment and make other clinical decisions. However, we do not have direct control over the clinical activities of our healthcare professionals, as their diagnoses and treatments of patients are subject to their professional judgment, and in most cases, must be performed on a real time basis.

In addition, some doctors who work on a consultancy basis are subject to proceedings for medical negligence, which may lead to their removal from the register of medical practitioners for a period of time or permanently. Even though we are not a party to such proceedings, our reputation and business may be adversely impacted by their negative outcomes and publicity. Furthermore, our healthcare professionals are susceptible to contracting diseases that we treat in our facilities, and if our healthcare professionals become infected, it may significantly reduce the treatment and care capacity at our medical facilities. In addition, medical consumables used in various treatments and other products we sell may be subject to contamination, mislabelling, malicious tampering and other damage such as errors in the dispensing and packaging of pharmaceuticals, which may lead to injury or death to our patients. Current or former patients or their families may commence or threaten litigation for medical negligence or malpractice against us. If such claims succeed, we may become liable for damages and other financial consequences and may even be exposed to criminal liability, which may materially and adversely affect our reputation, financial condition, results of operations and cash flows. Additionally, clinical trials conducted at our facilities may cause unintended adverse consequences including personal injury, sickness or death of patients participating in such trials. We could be held liable and may be required to pay damages for such consequences.

As litigations and regulatory proceedings are inherently unpredictable, we cannot assure you that any potential claims or disputes will not have a material adverse effect on our business, results of operations, and financial condition. Although we defend ourselves vigorously against claims and lawsuits, these matters could:

- require us to pay substantial damages or amounts in judgments or settlements, which individually or in the aggregate could exceed amounts, if any, that may be recovered under our insurance policies where coverage applies and is available;
- harm our reputation and the goodwill associated with our brand;
- cause us to incur substantial expenses and/or substantial increases in our insurance premiums;
- require significant time and attention from our management; and
- require us to incur debt to finance any damages or amounts in judgment or settlement.

If any of our cases are not resolved in our favor, and if our insurance coverage or any applicable indemnity is insufficient to cover the damages awarded, we may be required to make substantial payments or modify or restrict our operations, which could have an adverse impact on our reputation and competitive position, as well as our business and financial results. Also see “- Our insurance coverage may not adequately protect us against certain operating hazards and this may have an adverse effect on our business and revenues” below.

Products that we sell could become subject to contamination, product tampering, mislabelling or other damage. In addition, errors in the dispensing and packaging of pharmaceuticals could lead to serious injury, death or litigation. In addition, our operations involve the use of hazardous and flammable materials, including chemicals, radioactive and nuclear materials. Most of the radiation therapy and diagnostic imaging equipment we use contain radioactive and nuclear materials or emit radiation during operation. Radiation, radioactive materials and nuclear materials are extremely hazardous unless properly managed and contained. We source nuclear and radioactive material from authorized suppliers, and we store and dispose of such materials in accordance with the applicable rules and guidelines. We cannot eliminate the risk of contamination or injury from these materials. In the event of contamination or injury resulting from our use of hazardous materials, we could be held liable for any resulting damages, and any liability could exceed our resources. We also could incur significant costs associated with civil or criminal fines and penalties.

12. We are dependent on certain field of specialty for a substantial portion of our revenue, i.e. cardiology, neurosciences and general medicine. Any material impact on our earnings from these fields will impact our financial condition and results of operations significantly.

While our hospital provide multi-speciality services, we derive a substantial portion of our revenue from our cardiology, neurosciences and general medicine services. For the Fiscal 2023, our revenue from our cardiology, neurosciences and general medicine services contributed to 27.7%, 15.45% and 15.53% of our revenue from operations, respectively. Thus, our financial conditions and results of operations are dependent on our revenue from these fields. Due to our dependence on the field of cardiology, neurosciences and general medicine services, a number of factors could cause material fluctuations or decline in our revenue. These factors could include our inability to use modern technology and infrastructure while undertaking surgeries and procedures in these fields or the innovation and implementation of modern techniques by other hospitals which we are unable to implement, a decrease in the number of new patients registered, a loss of key experienced medical professionals, liabilities on account of medical negligence, or regulatory changes. A decline in our revenue from these fields could materially and adversely impact our business, prospects, financial condition and results of operations.

13. We face intense competition from other healthcare service providers. If we are unable to compete effectively, our business, results of operations and cash flows may be materially and adversely affected.

We compete with hospitals, clinics, diagnostic chains and dispensaries of varying sizes with different specialties. We compete on the basis of factors such as our specialty and other service offerings, quality and selection of healthcare professionals, affordability, quality of care, technology, quality of facilities, patient satisfaction, brand and reputation.

Our pharmacy in our hospital competes on factors such as price and product offerings. Some of our multi-specialty competitors offer services that we do not offer. Some of our competitors are owned or operated by governmental bodies or by private not-for-profit entities supported by endowments and charitable contributions, which can finance capital expenditures without incurring significant tax obligations. We may also face competition from new market entrants, such as established foreign healthcare companies which may enter the Indian market in the future. We are required to evaluate and increase our competitive position in each of our markets for example by offering competitive compensation to healthcare professionals and quality services with competitive rates to our patients. As a result, we may experience lower profitability as we strive to compete with our competitors on all fronts.

It is also possible that there will be significant consolidation in the medical industry. Our competitors may develop alliances, and these alliances may acquire significant market share. Concentration within the sector, or other potential moves by our competitors, could improve their competitive position and market share and may exert further pricing and recruiting pressure on us.

Existing or new competitors may try to compete for patients by exerting pricing pressures on some or all of our services by pricing their services at a significant discount to ours or offering services with greater convenience or better quality. Further, our competitors may expand their healthcare networks, which may exert further pricing and recruiting pressure on us. If we are unable to compete effectively with our competitors, our market share, business, financial condition, results of operations and cash flows could be materially and adversely affected.

14. *If we are unable to keep pace with technological changes, new equipment and service introductions, changes in patients' needs and evolving industry standards, our business and financial condition may be adversely affected.*

The healthcare services industry is characterized by periodic technological changes, new equipment and service introductions, changes in patients' needs and evolving industry standards, including, for example, changes associated with diagnosis process, treatments and patient-doctor interactions in telemedicine offerings. Our continued success depends on our ability to anticipate industry trends and identify, develop and market new value-added services that meet client demands, to continually enhance our equipment and technologies in a timely and cost-effective manner.

Developing new services and tools in a timely and cost-effective manner may be difficult, particularly as market preferences can change rapidly. Our assessment of the market and evolving customer preferences may not lead to new services that are commercially successful. We may also experience delays or failures in any stage of our service development, introduction or implementation. Our competitors may be more efficient at developing new services and may introduce those services to the market before us. The introduction of new or similar services by our competitors may result in reductions in our prices, profit margins, and market share. Further, as industry standards evolve, we may be required to enhance and develop our internal processes and procedures, as well as equipment and technologies, to comply with such standards and maintain the accreditations that we have received. The research, design and development of new services may also require significant resources, including financial and management time and attention. If we are unable to develop new services in a timely manner to meet market demand, or if there is insufficient demand for our services, our business, financial condition, results of operations and prospects may be materially and adversely affected.

Rapid changes in the medical and healthcare industry require sourcing for and investing in new medical equipment and technology. We may not be able to continually invest in, procure and integrate the latest equipment and technologies at commercially suitable terms and in a timely manner. We may not be able to recover the financial outlay for the medical equipment and systems that we invest in. We may incur significant costs in replacing or modifying equipment in which we have already made a substantial investment. New equipment and services based on new or improved technologies or new industry standards can lead to earlier than planned redundancy of our medical equipment and result in asset impairment charges in the future. Although we sometimes sell obsolete equipment back to the suppliers of such equipment, there can be no assurance that we will be able to continue to do so on financially viable terms. We may experience short-term disruptions to our operations if our equipment is damaged or breaks down. Extended downtime of our medical equipment, and repair or replacement costs of such equipment, could result in loss of revenue, client dissatisfaction, and damage to our reputation. Injuries caused by medical equipment in our healthcare facilities due to equipment defects, improper maintenance or improper operation could also subject us to liability claims, which may not be insured completely or at all. Regardless of their merit or eventual outcome, such liability claims could result in significant legal defence costs for us, damage to our reputation, and a material adverse effect on our business, financial condition and results of operation.

Our operations are also subject to risks inherent in the use of complex medical equipment. Some equipment we use in our hospital involves radioactive substances. Failures, accidents, defects, improper use or lack of maintenance of our equipment may lead to injury of our patients and healthcare professionals. We may incur significant repair and maintenance costs and may experience disruptions in our operations in the event of any material malfunction or breakdown of our equipment in the future. In addition, we may not be able to respond to such failures or malfunctions in a timely manner or with acceptable cost, which could adversely impact our ability to provide patients with necessary treatments and quality services, result in injury of our healthcare professionals, and damage our reputation.

15. Our revenues are significantly dependent on our single hospital in Dhanbad (Jharkhand). Any change in the economic or political circumstances in or around the areas of Dhanbad, could materially affect our business, financial condition and results of operations.

We derive almost all of our revenue from operations from our Dhanbad hospital. For instance, in Fiscal 2023, our total revenue were ₹ 7303.26 lakhs of which 99.54% were derived solely from the operations of Dhanbad hospital. Any material impact on our revenues from our hospital in Dhanbad, including by reason of a reduction in patient footfall, regulatory changes, reputational harm, liabilities on account of medical negligence, adverse publicity or natural calamities and increased competition, could have a material adverse effect on our business, financial condition and results of operations. Due to the geographical concentration of our hospital primarily in Dhanbad, we are exposed to adverse economic or political circumstances that affect demand for healthcare services in the region. Any regional slowdown, political unrest, disruption, disturbance or sustained downturn in the economy of such regions could adversely affect our business, financial condition and results of operations.

16. Our Company is dependent on limited number of external suppliers for its medicine and consumables requirements. Any delay or failure on the part of such suppliers to deliver products at acceptable prices, may adversely affect our business, profitability and reputation.

We rely on the limited number of suppliers for purchasing of medicines and consumables, which in turn, rely on third-party suppliers for sourcing of products. The contribution of our top five suppliers in our purchase of medicines and consumable items as a percentage of the total purchase during Fiscal 2023 is disclosed hereunder:-

S. No.	Supplier	% contribution in the total purchase (medicine and consumables) for Fiscal 2023
1	Supplier 1	71.79%
2	Supplier 2	1.79%
3	Supplier 3	1.50%
4	Supplier 4	1.47%
5	Supplier 5	1.47%
Total		78.02%

Our reliance on a limited number of suppliers for our business exposes us to risks, that may include, but are not limited to, reductions, delay or failure on the part of our suppliers to deliver products in a timely manner, deterioration in the financial condition or business prospects of these suppliers, failure to negotiate favourable terms with our key suppliers, all of which could have a material adverse effect on the business, financial condition, results of operations and future prospects of our Company.

We do not have any long term supply contracts with our suppliers. We generally make our purchases with suppliers through purchase orders. Thus, our suppliers may be unable to provide us with a sufficient quantity of medicines and consumables, at prices acceptable to us. Further, any unexpected rise in the prices of the medicines and consumables or shortage in supply or any adverse change in terms and conditions of supply would result in increase of our procurement cost. In case we are not able to pass on any such increase in cost to the patients because of competition or otherwise, it may affect the profitability of the Company.

We may not be able to renegotiate our pricing or delivery terms on a reasonable basis or find suitable alternative suppliers in the future, which may affect our business, financial condition, cash flows and results of operations. If we are required to identify alternative third parties for any of our required products, the process of qualification and approval could cause delays in providing services to clients. Any extended interruption in the supply of medicines and consumables could disrupt our operations and can have a material adverse effect on our business, results of operations or financial condition. Although we believe we have maintained stable relationships with these suppliers in the past, we cannot assure you that, we will be able to source adequate quantities of products in a timely manner from our existing suppliers in the future or we will be able to find alternative suppliers at acceptable prices and quality levels or at all. Our inability to do so may adversely affect our reputation, business, results of operations and cash flows

17. In the past, our Group Company, Asap Impact Private Limited has defaulted on payment of interest and repayment of loan.

In the past, our Group Company, Asap Impact Private Limited has defaulted in payment of Principal and interest amount on a loan availed from Allahabad Bank aggregating to ₹ 6.91 Crores. A recovery proceeding under SARFAESI Act, 2002 was initiated by the Bank against the Company and filed an application no. 213/2018 before the Debt Recovery Tribunal Allahabad. Subsequently the Company has made a one-time-settlement with the bank and paid the settled amount in full and obtained a No Objection Certificate dated 11.07.2019. The said defaulted loan account has been closed on 28.06.2019 by the bank.

18. We rely on third party suppliers and manufacturers for our supplies and equipment. Failure of such third parties to meet their obligations could adversely affect our business, results of operations and cash flows.

We source our equipment and supplies from third party suppliers under various arrangements. Any failure to procure equipment, reagents or drugs on a timely basis, or at all, from such third parties and on commercially suitable terms could affect our ability to provide our services. Certain of our medical and laboratory equipment are also procured under lease agreements. Under some of these agreements, the supplier generally has the discretion to terminate the agreement with a specified period of notice in the event of a breach of any term or condition of the agreement, including but not limited to default in payment of the applicable fee. Any such termination and consequent removal of the installed equipment may adversely affect our operations. In addition, manufacturers may discontinue or recall equipment, reagents or drugs used by us, which could adversely affect our ability to provide our services, and therefore, could adversely affect our business, results of operations and cash flows.

We also rely on a limited number of equipment suppliers to carry out repairs and maintenance of our equipment. Any failure or negligence by these third parties in performing maintenance on our equipment could result in harm to our healthcare professionals or patients and could adversely affect our business, results of operations, reputation and brand. Our dependence on a limited number of service providers exposes us to risks of delays or inability in carrying out repairs and maintenance of equipment. We may also be unable to find alternative service providers in time, or at all, and at a suitable cost. In some cases, we depend on the original equipment manufacturer or an even more limited pool of “authorized” service providers for equipment repair and maintenance, which exposes us to further risk of delay or higher repair and maintenance costs. Any delay or inability to repair and maintain our equipment could cause disruptions in our operations and adversely affect our business, financial condition and cash flows.

There can be no assurance that we will be able to maintain our relationships with our major suppliers. If the business relationship between our Company and our major suppliers were to deteriorate or if any of those suppliers were to terminate their business relationship with our Company or renegotiate our contracts on less favourable terms, our business, results of operations and prospects may be adversely affected. We could also experience higher costs, network healthcare provider disruptions, less attractive services for our clients and/or difficulty in meeting regulatory or accreditation requirements, any of which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

19. Certain of our properties are taken by us on lease basis for a fixed term and is subject to several terms and conditions. In the event of non-compliance with such conditions or if we are unable to execute or renew the lease agreement or if such agreement is terminated, we may suffer a disruption in our operations and financial condition.

We have taken 9.55 acres of land at Ranguni, Dhanbad on lease basis through lease deeds dated January 21, 2021 for a period of 30 years from Jharkhand Industrial Area Development Authority (JIADA) which is subject to renewal at the option of both the parties, after the expiry of 30 years, for another 30 years. Currently, we are building a cancer hospital and educational institute over such land. There can be no assurance that we will not face any disruption of our rights and that such agreement will not be terminated prematurely by the Lessor. Any default of terms and conditions of such deeds or such non-renewal or early termination or any disruption of our rights will adversely affect our business operations and revenue of the business. Further, our Company has been provisionally allotted a land on leasehold basis from Ranchi Smart City Corporation Limited (A Government of Jharkhand Undertaking) on April 22, 2022 for which we have made payment of ₹ 5.10 Cr and balance payment of ₹ 7.65 Cr was required to be paid by April 21, 2023. However, we have sought an extension through request letter dated April 26, 2023 to RSCCL to grant us an extension of 2 months for remaining payment, and further we have again requested RSCCL through letter dated June 23, 2023 for granting us an extension of 2 months. In case the RSCCL does not consider our extension request and if we fail to make the payment timely either through issue proceeds or from internal sources/unsecured borrowings, the RSCCL can cancel the provisional allotment order and can forfeit the initial amount of ₹ 5.10 Cr, on account of which our business, financial condition, reputation and ability to compete effectively could be impaired, which would have a material adverse impact on our business, financial condition, results of operations and prospects.

20. We face several risks associated with the development of proposed Cancer Hospital, for which we intend to utilize a portion of the net proceeds, which could hamper our growth, prospects, cash flows and business and financial condition.

We intend to utilize a portion of the Net Proceeds of this Issue towards proposed cancer hospital. During the process of setting up of the Cancer Hospital, we may face several difficulties such as cost overruns or delays for various reasons, including, but not limited to, our financial condition, changes in business strategy and external factors such as market conditions, competitive environment and interest or exchange rate fluctuations, changes in specification, increase in input costs of construction materials and labour costs, incremental preoperative expenses, taxes and duties, start-up costs, interest and finance charges, working capital margin, environment and ecology costs and other external factors which may not be within the control of our management, which may in turn delay the utilization of the Net Proceeds which in turn delay the commencement of commercial operation of our proposed Cancer Hospital.

Any delay in setting up of our proposed facilities could lead to revenue loss for our Company and delay in utilisation of Net Proceeds. Further, setting up a Cancer Hospital may be subject to delays and other risks, which may be caused due to certain other unforeseen events, such as unforeseen engineering or technical problems, disputes with workers, unanticipated cost increases or changes in scope and delays in obtaining certain government approvals and consents. While we may seek to minimize the risks from any unanticipated events, it cannot be assured that all potential delays could be mitigated and that we will be able to prevent any cost and time over-runs and any loss of profits resulting from such delays, shortfalls and disruptions. Further, the estimated cost may prove insufficient to meet the requirements of the proposed capital expenditure due to, among other things, cost escalation, which could drain our internal cash flows or compel us to raise additional capital, which may not be available on terms favourable to us or at all.

We cannot assure that we will be able to complete the setting up of our Cancer Hospital in time and install the equipment in accordance with the proposed schedule of implementation and any delay in setting up of the Cancer Hospital in a timely manner, or at all, could have an adverse impact on our growth, prospects, cash flows and business and financial condition. Furthermore, the quotations for equipment might expire and we may be compelled to purchase the same at a higher cost. Our financial condition, results of operations and liquidity would be materially and adversely affected if our project costs materially exceed such estimated amounts. For further details, please refer to chapters titled “*Objects of the Issue*” and “*Our Business*” on pages 81 and 109, respectively of this Draft Red Herring Prospectus.

21. Our Company had negative cash flow in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

The detailed break up of cash flows is summarized in below mentioned table and our Company has reported negative cash flow in certain financial years:

Particulars	(₹ in Lakhs)

There can be no assurance that our net cash flows shall be positive in the future. Any negative cash flows in the future over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our cash flows, business, future financial performance and results of operations could be materially and adversely affected. For further details, see “*Financial Statements as Restated*” beginning on page 161 of this Draft Red Herring Prospectus.

(₹ in lakhs)	
Particulars	March 31, 2023

For further details of the contingent liabilities and commitments of our Company as on March 31, 2023, see “**Restated Financial Information**” on page 161 of this Draft Red Herring Prospectus. If a significant portion of these liabilities materialize, fully or partly, it could have an effect on our results of operations and financial condition. Further, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the future.

25. Our indebtedness and the conditions and restrictions imposed by our financing arrangements may limit our ability to grow our business and adversely impact our business.

There are restrictive covenants in agreements entered into by our Company with certain banks and financial institutions for short-term loans and long-term borrowings. These restrictive covenants require us to seek the prior consent of these banks and financial institutions for various activities, including effecting any changes to our capital structure or shareholding pattern, raising fresh capital or any term loans or debentures; undertaking any merger, amalgamation or restructuring, utilizing loans for purposes other than those set out in the financing agreement, implementing any scheme of expansion, diversification or modification (other than incurring routine capital expenditure), disposing of any assets; taking actions that result in a change of control over us, declaring or paying dividends, making investments in other concerns and effecting any amendments in our memorandum and articles of association.

26. We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.

Our Company has entered into related party transactions with our Promoters, Directors and Group Entities. While our Company believes that all such transactions have been conducted on the arm’s length basis, there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For details, please refer to “**Related Party Transactions**” under section titled “**Financial Statements as Restated**” on page 186 of this Draft Red Herring Prospectus.

27. If we fail to achieve favourable pricing on medical consumables, pharmacy items, drugs, and surgical instruments from our suppliers or are unable to pass on any cost increases to our payers, our profitability could be materially and adversely affected.

Our profitability is susceptible to the cost of medical consumables, pharmacy items, drugs and surgical instruments etc. The complex nature of the treatments and procedures we perform at our hospital requires us to invest in new technology and equipment from time to time, which is generally expensive. Our profitability is affected by our ability to achieve favourable pricing on our medical consumables, pharmacy items and medical equipment from our suppliers, including through negotiations for supplier rebates. Because these supplier negotiations are continuous and reflect the ongoing competitive environment, the variability in timing and amount of incremental supplier discounts and rebates can affect our profitability. These supplier programs may change periodically, potentially resulting in higher cost of surgical instruments, drugs and consumables and adverse profitability trends, if we cannot adjust our prices to accommodate such increase in costs. Further, such increased costs may negatively impact our ability to deliver quality care to our patients at competitive prices. If we are unable to adopt alternative means to deliver value to our patients, our revenue and profitability may be materially and adversely affected.

We may be unable to anticipate and react to the increase in cost of surgical instruments, medical consumables and pharmacy items in the future, or may be unable to pass on these cost increases to our payers, which could materially and adversely affect our profitability.

28. We could be exposed to risks relating to the handling of personal information, including medical data.

Our information technology system is critical systems are critical to our business. We rely on the information technology system to store the personal details data of our patients. The regulatory guidelines generally require medical institutions to protect the personal data, of their patients or clients and prohibit unauthorized disclosure or usage of personal information, including medical data. Compliance with new and evolving privacy and security laws, regulations and requirements may result in increased operating costs which may in turn affect our business, financial condition, results of operations and prospects. We are vulnerable to the failures of our information technology system, which could affect our business, deficiencies in managing our information systems and data security practices may lead to leaks of patient records, test results, prescriptions, lab records and other confidential and sensitive information which could adversely impact our business and damage our reputation.

29. *We are dependent on a number of key personnel, including our Promoters and senior management, and the loss of or our inability to attract or retain such persons could adversely affect our business, financial condition, results of operations and cash flows.*

Our performance is highly dependent on our Promoters, senior management and other key personnel to maintain our strategic direction, manage our operations and meet future business challenges that may also arise in relation to our business. The loss of, or inability to attract or retain, such persons could materially and adversely affect our business and financial results. In particular, the active involvement of our Promoters in our operations and the services of our senior management and our key management personnel have been integral to our development and business. For details in relation to the experience of our Promoters and key management personnel, see “*Our Promoters and Promoter Group*” and “*Our Management*” on pages 154 and 142 respectively of this Draft Red Herring Prospectus. If one or more of these individuals or any other member of our senior management team are unwilling or unable to continue in their present positions, we may not be able to replace them with persons of comparable skill and expertise promptly, which could have a material adverse effect on our business, financial results, results of operations and cash flows. We may take a significant period of time to hire and train replacement personnel when skilled personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting skilled employees that our business requires. If we are unable to hire and train replacement personnel in a timely manner or increase our levels of employee compensation to remain competitive, our business, financial results, results of operations and cash flows may be materially and adversely affected.

30. *Our insurance coverage may not adequately protect us and this may have an adverse effect on our business and revenues.*

Our Company has obtained insurance coverage in respect of certain risks. We have taken insurance policies such as Fire & Special Perils Policy, Burglary Insurance Policy and Vehicle Policies. Our insurance policies do not cover all risks, specifically risks such as error and omission medical establishment policy, business interruption insurance, money insurance, cash in transit, machinery/equipment breakdown, keyman insurance, group personal accident or mediclaim policy. Failure to effectively cover ourselves against the associated risks may potentially lead to material losses. There can be no assurance that our insurance policies will be adequate to cover the losses/ damages suffered or that such insurance coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim. If we suffer a significant uninsured loss or if insurance claim in respect of the subject matter of insurance is not accepted or any insured loss suffered by us significantly exceeds our insurance coverage, our business, financial condition and results of operations may be materially and adversely affected.

31. *Pricing regulations and reforms in the healthcare industry and the uncertainty associated with pharmaceutical pricing and other matters could adversely affect our business, results of operations and cash flows.*

In India, pharmaceutical prices are subject to regulation and the Government has been actively reviewing prices for pharmaceuticals and their trade margins. India enacted the National Pharmaceuticals Pricing Policy in 2012, which lays down the principles for pricing essential drugs. As a result, a number of drug formulations were identified as essential drugs and were added to India’s National List of Essential Medicines, 2015 and these drugs are subjected to price controls in India. On May 15, 2013, the Department of Pharmaceuticals, Ministry of Chemicals and Fertilizers released the DPCO 2013 (which replaced the earlier Drugs (Prices Control) Order, 1995). The DPCO 2013 governs the price control mechanism for formulations listed in the National List of Essential Medicines. Our ability to achieve favorable pricing may be affected by such government policies which regulate the pricing of medical items. For example, the National Pharmaceutical Pricing Authority has in the past set ceiling on prices of cancer drugs, cardiac stents, drug eluting stents and intra-uterine devices.

The DPCO 2013 is amended from time to time, to fix or revise the ceiling prices of certain drug formulations sold in India. The National Pharmaceutical Pricing Authority (“NPPA”) also from time to time notifies ceiling price for additional formulations either under the DPCO or in the National List of Essential Medicines. Under the terms of the DPCO 2013, non-compliance with the notified ceiling price or breaching the ceiling price would be tantamount to overcharging the consumer under the order, and the amount charged over and above the ceiling price shall be recovered along with interest thereon from the date of overcharging. Any action for violation of pricing regulations may divert management attention and could adversely affect our business, financial condition, results of operations and prospects. While we cannot predict the nature of the measures that may be adopted by governmental organizations in the future or their effect on our business and revenues, the announcement or adoption of such proposals may affect our profit margins, results of operations and cash flows.

32. We are vulnerable to failures of our information technology system, which could adversely affect our business.

Our information technology system is critical to our business. We rely on our technology system to, among other things, manage accounting and financial reporting, facilitate consultations among healthcare professionals, prepare and manage medical records, financial records, training programs and inventory. If we experience an interruption or a reduction in the performance, reliability or availability of our technology architecture from natural or man-made causes, or from disruptions from our local service providers, our operations and ability to manage our administrative systems could be adversely impacted. Any technical failures associated with our information technology system, including those caused by power failures, computer viruses and other unauthorized tampering, may impair our ability to provide services to our patients. Corruption of certain information could also lead to delayed or inaccurate judgments or diagnoses in our treatment of patients, and could result in damage to the welfare of our patients. Any failure of our IT systems could materially and adversely affect the operation of all of our hospital.

In addition, since we rely on our technology systems to manage our accounting and financial functions, including processing payments to network healthcare providers and invoicing our clients, any technical failures or errors, including errors in manual data entry or programming, could materially and adversely impact our financial reporting, results of operations and cash flows, as well as our reputation and relationships with our network healthcare providers and clients.

We may be subject to cyberattacks and other cybersecurity risks and threats, including computer break-ins, phishing, and social engineering. Cybersecurity vulnerabilities may put us at risk for possible losses due to fraud, operational disruptions, or the unintended dissemination of sensitive personal information, proprietary information or confidential information. We may also be subject to liability as a result of any theft, loss, unauthorized disclosure or misuse of confidential, sensitive and/ or personal information stored on our systems. The development of our information technology system is generally outsourced to third party suppliers, over which we have limited control. Failure by such third-party suppliers to adequately secure or manage our information and systems, as well as their discontinuation of existing products and services that we rely on, may adversely affect our operations.

There can be no assurance that we will not encounter data migration or other errors, which could result in the loss of important data, interruptions, delays or cessations in the availability of our systems, any of which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

33. There may be potential conflict of interests between Our Company, Promoter Group Entities, Group Company and other venture or enterprises promoted by our promoter or directors

Our Group Company i.e., Asap Impact Private Limited is running a Hospital in the name of “Asarfi Hospital” at Ballia, Uttar Pradesh that may potentially compete with our Company or are authorized to carry out business, similar to that of our Company. We may hence have to compete with our Group Company for business, which may impact our business, financial condition and results of operations. The interests of our Promoters or Promoter Groups may also conflict in material aspects with our interests or the interests of our shareholders. For further details, please refer “**Our Promoter and Promoter Group**” beginning on page 154 of this Draft Red Herring Prospectus. Further, our Promoters may involve in ventures that may potentially compete with our Company. The interests of our Promoters or Promoter Groups may conflict with the interests of our other Shareholders and our Promoters may, for business considerations or otherwise, cause our Company to take actions, or refrain from taking actions, in order to benefit themselves instead of our Company's interests or the interests of its other Shareholders and which may be harmful to our Company's interests or the interests of our other Shareholders, which may impact our business, financial condition and results of operations.

We have not entered into any non-compete agreement with our Promoters and/or Promoter Groups and/or our Promoter Group Entity. We cannot assure you that our Promoters and/or our Promoter Group Entity and/or members of the Promoter Group will not compete with our existing business or any future business that we may undertake or that their interests will not conflict with ours. Any such present and future conflicts could have a material adverse effect on our reputation, business, results of operations and financial condition.

34. We may not be able to protect our brand name and trademarks.

Our name “Asarfi Hospital” and registered trademark  is very crucial to our business. We believe that our reputation and brand are associated with the “Asarfi Hospital” name, and that this association has contributed towards the success of our business. We believe that our trademarks and other proprietary rights have significant value and are important to identifying and differentiating our healthcare services from those of our competitors and creating demand for our healthcare services.

Unauthorized use of our brand name or logo by third parties could adversely affect our reputation, which could in turn adversely affect our business, financial condition and results of operations. Intellectual property rights and our ability to enforce them may be unavailable or limited in some circumstances. Loss of intellectual property may significantly affect our media and advertising activities, and loss of equity for the “Asarfi Hospital Limited” brand, thus adversely affecting our business, revenue and prospects.

35. *Our operations are subject to high working capital requirements. Our inability to maintain an optimal level of working capital required for our business may impact our operations adversely.*

Our business requires significant amount of working capital and major portion of our working capital is utilized towards trade receivables. Our growing scale and expansion, if any, may result in increase in the quantum of current assets. Our inability to maintain sufficient cash flow, credit facility and other sources of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. Further, we have high outstanding amount due from our debtors which may result in a high risk in case of non-payment by these debtors. In case of any such defaults from our debtors, may affect our business operations and financials. For further details regarding working capital requirement, please refer to the section “*Objects of the Issue*” on page 81 of this Red Herring Prospectus.

36. *We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule.*

The proposed fund requirement for part funding of capital expenditure of Cancer Hospital at Ranguni, Jharkhand and acquiring land on leasehold basis for Health Management and Research Institute at Ranchi, Jharkhand as detailed in the section titled “*Objects of the Issue*” is to be funded from the proceeds of this IPO. We have not identified any alternate source of funding and hence any failure or delay on our part to mobilize the required resources or any shortfall in the Issue proceeds may delay the implementation schedule. We therefore, cannot assure that we would be able to execute our future plans/strategy within the given timeframe. For details, please refer to the Chapter titled “*Objects of the Issue*” beginning on page 81 of this Red Herring Prospectus.

37. *The Objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. Any variation between the estimation and actual expenditure as estimated by the management could result in execution delays or influence our profitability adversely.*

The deployment of funds as stated in the “*Objects of the Issue*” beginning on page 81 of this Red Herring Prospectus is entirely at the discretion of our management and has not been appraised by any independent agency. Further, the purposes for which the Net Proceeds are to be utilised have not been appraised by an independent entity and are based on our estimates and on third-party quotations. In the event, for whatsoever reason, we are unable to execute our plans, we could have a significant amount of unallocated net proceeds. In such a situation, we would have broad discretion in allocating these net proceeds from the Issue without any action or approval of our shareholders. In case the assumptions on which these estimates have been made are not correct or they become un-realistic then there will be a variation in the estimates and the actual expenditure incurred which could result in execution delays and have an adverse effect on our operations and profitability.

38. *We may require additional funding to finance our operations, which may not be available on terms acceptable to us, or at all, and if we are unable to raise funds, the value of your investment in us may be negatively impacted.*

We operate in a capital-intensive industry and may need additional funding to finance our operations and growth strategies. Sources of additional financing may include commercial bank borrowings, supplier financing, or the sale of equity or debt securities. There can be no assurance that we will be able to obtain any additional financing on terms acceptable to us, or at all. The cost of raising capital may be high. Any additional funding, we obtain may strain our cash flows and financial condition. Our ability to raise additional financing in the future is subject to a variety of uncertainties, including but not limited to:

- our future financial condition, results of operations and cash flows;
- general market conditions for debt financing and capital raising activities; and
- economic, political and other conditions in India.

If we raise additional funds through any additional equity or equity-linked financing, your equity interest in our Company may be diluted. Alternatively, if we raise additional funds by incurring debt obligations, we may be subject to various covenants under the relevant debt instruments that may, among other things, restrict our ability to pay dividends or obtain additional financing. Servicing such debt obligations could also be burdensome to our operations. If we fail to service such debt obligations or are unable to comply with any of the covenants thereunder, we could be in default under such debt obligations and our liquidity and financial condition could be materially and adversely affected.

39. *We may be subject to worker unrests and increased wage expenses which could materially and adversely affect our business, financial condition, results of operations and cash flows.*

India has stringent labor legislations that protect the interests of workers, which includes legislation that sets forth detailed procedures for the establishment of labor unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment of employees. Even though our employees are not unionized, in the event that employees at our hospital seek to unionize, our costs may increase and our business could be adversely affected. While we have not experienced any strikes or labour unrest at any of our hospital in the past, occurrence of strikes and work-stoppage in the future could adversely affect our reputation, business, financial condition, results of operations and cash flows.

We are also subject to laws and regulations governing relationships with our employees, in areas such as minimum wage and maximum working hours, overtime, working conditions, hiring and terminating of employees. If we fail to comply with such regulations, it could lead to enforced shutdowns and/or other sanctions imposed by the relevant authorities. If labour laws become more stringent, it may become difficult for us to maintain and continue to optimize our flexible human resource policies, which could have an adverse effect on our business, financial condition, results of operations and cash flows. Our financial condition may also be adversely affected by other changes in labour laws.

40. *Our Company is yet to place orders for some of the machineries for the proposed Cancer Hospital at Ranguni. Any delay in placing orders or procurement of such machinery may delay the schedule of implementation and possibly increase the cost of commencing operations.*

Our Company has received third party quotations for the machinery proposed to be installed at our proposed Cancer Hospital at Ranguni. Although, we have identified the type of machinery proposed to be purchased from the Net Proceeds. However, we have placed orders for some of the machineries and we are yet to place orders for the remaining i.e. we are yet to place orders for the Plant & Machinery amounting to ₹ 453.43 Lakhs constituting 11.69% of the total Plant & Machinery cost. The cost of the proposed purchase of machinery is based on the quotations received from third party vendors and contractors and such quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. For details, please refer to the chapter titled “*Objects of the Issue*” beginning on page 81 of this Draft Red Herring Prospectus.

We cannot assure that we will be able to procure the machinery in a timely manner and at the same price at which the quotations have been received. In the event of any delay in placing the orders, or an escalation in the cost of acquisition of the equipment or in the event the vendors are not able to provide the equipment in a timely manner, or at all, we may encounter time and cost overruns. Further, if we are unable to procure machinery from the vendors from whom we have procured quotations, we cannot assure you that we may be able to identify alternative vendors to provide us with the machinery which satisfy our requirements at acceptable prices. Our inability to procure the machinery at acceptable prices or in a timely manner, may result in an increase in capital expenditure, the proposed schedule implementation and deployment of the Net Proceeds may be extended or may vary accordingly, thereby resulting in an adverse effect on our business, prospects and results of operations.

41. *Our ability to pay dividends in the future will depend on our earnings, financial condition, working capital requirements, capital expenditures and restrictive covenants of our financing arrangements.*

We have never declared or paid any cash dividends in the past three years. Our ability to pay dividends in the future will depend on our earnings, financial condition, cash flow, working capital requirements, capital expenditure and restrictive covenants of our financing arrangements. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and in accordance with the dividend distribution policy adopted by our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot assure you that we will be able to pay dividends in the future. Please refer to the chapter titled “*Dividend Policy*” beginning on page 160 of this Draft Red Herring Prospectus.

42. *Certain of our individual Promoters, Directors and Key Managerial Personnel hold Equity Shares in our Company and are therefore interested in our performance in addition to their remuneration and reimbursement of expenses.*

Certain of our Directors (including our individual Promoters) hold equity interests in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company. We cannot assure you that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Promoters may take or block actions with respect to our business which may conflict with the best interests of our Company or that of minority shareholders. For details on the interest of our Promoters and Directors of our Company, other than reimbursement of expenses incurred or normal remuneration or benefits, see “*Our Management*”, on page 142 of this Draft Red Herring Prospectus.

43. *Our Promoters and members of our Promoter Group will continue to retain control over our Company after completion of the Offer, which will allow them to influence the outcome of matters submitted for approval of our shareholders.*

After completion of the Issue, our Promoters and Promoter Group will collectively own 55.40% of the total post issue Equity Shares. As a result, our Promoter together with the members of the Promoter Group will be able to exercise a significant degree

of influence over us and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring any strategic decision favourable to the Company or effecting a change in control of our Company for the betterment of the stakeholders.

In addition, our Promoter will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or minority shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

44. *Our hospital is susceptible to risks arising on account of fire and other incidents.*

We store, handle and use certain chemicals, such as alcohol, sanitizers, gases, fuel and other inflammable materials at some of our hospital. Healthcare facilities are subject to risks associated with fires, power failures, telecommunications failure and other events. Such events could materially impact our business in the future. Furthermore, any short circuit of power supply for our equipment and machines including air conditioning plants, power supplies, could result in accidents and fires that could result in injury or death to our employees, our patients, and other persons present at our hospital. While we have not encountered any significant accidents in the past three years, there is no assurance such accident will not happen in the future. In the event of such an incident, we cannot assure you that our insurance coverage will be sufficient to cover all damages and losses we become liable for.

45. *If we are unable to establish and maintain an effective internal control, our business and reputation could be adversely affected.*

We are responsible for establishing and maintaining adequate internal measures commensurate with the size and complexity of operations. We periodically test and update our internal processes and systems and there have been no past material instances of failure to maintain effective internal controls and compliance system. However, we are exposed to operational risks arising from the potential inadequacy or failure of internal processes or systems, and our actions may not be sufficient to ensure effective internal checks and balances in all circumstances.

We take reasonable steps to maintain appropriate procedures for compliance and disclosure and to maintain effective internal controls over our financial reporting so that we produce reliable financial reports and prevent financial fraud. As risks evolve and develop, internal controls must be reviewed on an ongoing basis. Maintaining such internal controls requires human diligence and compliance and is therefore subject to lapses in judgment and failures that result from human error. Any lapses in judgment or failures that result from human error can affect the accuracy of our financial reporting, resulting in a loss of investor confidence and a decline in the price of our equity shares.

46. *The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since the Issue size is less than ₹ 10,000.00 Lakh there is no mandatory requirement of appointing an independent monitoring agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

47. *In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.*

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter “*Objects of the Issue*” on page 81 of this Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and implementation plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

48. *Certain key performance indicators for certain listed industry peers included in this Red Herring Prospectus have been sourced from public sources and there is no assurance that such financial and other industry information is complete*

Pursuant to the requirements of the SEBI ICDR Regulations, we have included certain key performance indicators, comprising financial and operational information, for certain listed industry peers, in the “*Basis for Issue Price*” beginning on page 90 of the Red Herring Prospectus. Although this information is sourced from and relied upon on the consolidated audited financial statements of the relevant listed industry peers as available on the websites of the Stock Exchanges, including the annual reports of the respective companies submitted to Stock Exchanges, there is no assurance that this information with respect to industry peers is either complete. There maybe different methodologies and formulas used to compute the various ratios.

49. Any future issuance of Equity Shares may dilute your shareholding and sale of Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares.

We may in the future issue equity shares, debt securities and other kind of financing instrument to finance our future growth or fund our business activities. Any future equity issuances by us, may lead to the dilution of investors' shareholdings in our Company. The trading price of the Equity Shares may be adversely affected by our future equity issuances (including under an employee benefits scheme), disposal of our Equity Shares by the Promoters or any of our other principal shareholders, changes in our shareholding structure to comply with minimum public shareholding norms applicable to listed companies in India, or any public perception regarding such issuance or sales, which may lead to other adverse consequences including difficulty in raising capital through offering of our Equity Shares or incurring additional debt. There can be no assurance that we will not issue additional Equity Shares at a price which is lower than the Offer Price or that our existing shareholders including our Promoters will not dispose of further Equity Shares after the completion of the Offer (subject to compliance with the lock-in provisions under the SEBI ICDR Regulations) or pledge or encumber their Equity Shares. Any future issuances could also dilute the value of shareholders' investment in the Equity Shares and adversely affect the trading price of our Equity Shares. Such securities may also be issued at prices below the Offer Price.

50. The Equity Shares have never been publicly traded, and, after the Offer, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Offer Price, or at all.

Prior to the Offer, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Offer. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to factors including variations in the operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

51. Requirements of being a listed company may strain our resources.

We are not a listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations which will require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition, results of operations and cash flows. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

52. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Draft Red Herring Prospectus.

While facts and other statistics in the Draft Red Herring Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various web site data and IBEF that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "**Industry Overview**" beginning on page 97 of this Draft Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

EXTERNAL RISK FACTORS

53. Challenges that affect the healthcare industry will have an effect on our operations.

Our business is subject to challenges as faced with by the entire Indian healthcare industry, including, among others, providing quality patient care in a competitive environment while managing costs. We face competition from government- owned hospitals, other private hospitals, clinics, hospitals operated by non-profit organizations. Furthermore, healthcare costs in India have increased significantly over the past decade. There have been and may continue to be proposals by legislators and regulators to lower healthcare costs in India and limit the rate of increase, cap the margins and fix the price of healthcare procedures and diagnostics. Certain proposals by the Government of India, if passed, could impose, among other things, limitations on prices for our services.

In addition, our business, our business, financial condition, results of operations and prospects may be adversely affected by other factors that may impact the broader Indian healthcare industry, including but not limited to:

- general economic conditions which adversely impact the quantum of disposable income that can be allocated for healthcare services;
- temporary requisitioning of healthcare facilities due to health pandemics such as COVID-19;
- demographic changes, such as an increase in the percentage of elderly patients, which could result in increased government expenditures for healthcare services and lead to various price control measures in relation to healthcare costs in India;
- the expansion rate of health insurance coverage in India;
- seasonal cycles of illness as a function of varying climate, weather conditions and disease outbreaks; and
- shortage of qualified healthcare professionals.

Any failure by us to effectively address these and other factors could have an adverse effect on our business, results of operations and financial condition.

54. Changing laws, rules and regulations and legal uncertainties, including tax laws and regulations, may adversely affect our business and financial performance.

The governmental and regulatory bodies in India and other jurisdictions where we operate may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, financial condition, results of operations and cash flows.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment laws governing our business, operations and investments in our Company by non-residents, could result in us being deemed to be in contravention of such laws and/or may require us to apply for additional approvals.

Tax and other levies imposed by the central and state governments in India that affect our tax liability include central and state taxes and other levies, income tax, turnover tax, goods and services tax, stamp duty and other special taxes and surcharges which are introduced on a temporary or permanent basis from time to time. The final determination of our tax liabilities involves the interpretation of local tax laws and related regulations in each jurisdiction as well as the significant use of estimates and assumptions regarding the scope of future operations and results achieved and the timing and nature of income earned and expenditures incurred. We are involved in various disputes with tax authorities. For details of these disputes, see *“Outstanding Litigation and Material Developments”* on page 203 of this Draft Red Herring Prospectus. Moreover, the central and state tax scheme in India is extensive and subject to change from time to time.

55. The market price of our Equity Shares may be adversely affected by additional issues of equity or equity linked securities or by sale of a large number of our Equity Shares by our Promoters and significant shareholders and additional issues of equity may dilute your equity position.

We may be required to finance our growth or strengthen our balance sheet through additional equity offerings. Any future issuance of equity or equity-linked securities by us may dilute the positions of investors in our Equity Shares and could adversely affect the market price of our Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. Although our Promoters will be subject to a lock-in after the Offer, sales of a large number of our Equity Shares by our Promoters and significant shareholders after the expiry of the lock-in periods could adversely affect the market price of our Equity Shares. For further details on the lock-in of Equity Shares, see *“Capital Structure”* on page 60 of this Draft Red Herring Prospectus.

56. *There is no existing market for our Equity Shares, and we do not know if one will develop. The price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Offer Price, or at all.*

Prior to the Offer, there has been no public market for our Equity Shares, and an active trading market on the Indian Stock Exchanges may not develop or be sustained after the Offer. The Offer Price of the Equity Shares may bear no relationship to the market price of the Equity Shares after the Offer. The market price of the Equity Shares after the Offer may be subject to significant fluctuations in response to, among other factors, variations in our operating results, market conditions and environment towards developments relating to India and volatility in the securities markets elsewhere in the world.

57. *Any downgrading of India's debt rating by an international rating agency could have an adverse impact on our business.*

Any adverse revision to the rating of India's domestic or international debt by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such funding is available. This could have an adverse effect on our business and future financial performance, its ability to obtain financing for capital expenditures and the trading price of the Equity Shares.

58. *Our business is dependent on the Indian economy. Any adverse development or slowdown in Indian economy may have an adverse impact on our business, results of operations and financial condition.*

The performance and growth of our business are necessarily dependent on economic conditions prevalent in India, which may be materially and adversely affected by central or state political instability or regional conflicts, a general rise in interest rates, inflation, and economic slowdown elsewhere in the world or otherwise.

There have been periods of slowdown in the economic growth of India. India's economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in currency exchange rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the Indian economy or a further increase in inflation could have a material adverse effect on the price of our medical equipment for our services and, as a result, on our business and financial results.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in the emerging market in Asian countries. Financial turmoil in Asia, Europe, the U.S. and elsewhere in the world have affected the Indian economy in the past. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability, including the financial crisis and fluctuations in the stock markets in China and further deterioration of credit conditions in the U.S. or European markets, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and financial results.

59. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- Custom duties on imports of raw materials and components;
- Goods and Service

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

60. *Financial instability in the global or Indian financial markets could adversely affect our results of operations and financial condition and may cause the price of our Equity Shares to decline.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in the United States and Asian emerging market countries. Financial turmoil in the global economy has affected the Indian economy in the past. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

61. Any catastrophe, including natural calamities, man-made disasters, health epidemics and other outbreaks, could have a negative effect on the Indian economy and cause our business to suffer.

India has experienced natural calamities such as cyclones, earthquakes, tsunami, floods and drought in the past few years. The extent and severity of these natural disasters determines their effect on the Indian economy. The erratic progress of a monsoon would also adversely affect sowing operations for certain crops. Further prolonged spells of below normal rainfall or other natural calamities and outbreak of pandemics like COVID-19 in the future could have a negative effect on the Indian economy, adversely affecting our business and the price of our Equity Shares.

62. Civil disturbances, regional conflicts and other acts of violence in India and abroad may disrupt or otherwise adversely affect the Indian economy.

Certain events that are beyond the control of our Company, such as violence or civil unrest, including those involving India, the United Kingdom, the United States or other countries, may adversely affect worldwide financial markets and could potentially lead to a severe economic recession, which could adversely affect our business, results of operations, financial condition and cash flows, and more generally, any of these events could lower confidence in India's economy. Southern Asia has, from time to time, experienced instances of civil unrest and political tensions and hostilities among neighbouring countries. Political tensions could create a perception that there is a risk of disruption of services provided by India-based companies, which could have an adverse effect on our business, future financial performance and the price of the Equity Shares. Furthermore, if India were to become engaged in armed hostilities, particularly hostilities that are protracted or involve the threat or use of nuclear weapons, the Indian economy and consequently Company's operations might be significantly affected. India has from time to time experienced social and civil unrest and hostilities, including riots, regional conflicts and other acts of violence. Events of this nature in the future could have an adverse effect on our ability to develop our business. As a result, our business, results of operations and financial condition may be adversely affected.

63. The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.

The Issue price is based on numerous factors and may not be indicative of the market price for our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurance that you will be able to resell your Shares at or above the Issue Price. Among the factors that could affect our Share price are: quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net profit and income; changes in income or earnings estimates or publication of research reports by analysts; speculation in the press or investment community; general market conditions; and domestic and international economic, legal and regulatory factors unrelated to our performance.

64. The price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not develop.

Prior to this Issue, there has been no public market for our Equity Shares. However, the trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, the Indian Capital Markets, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue. For further details of the obligations and limitations of Market Makers, please refer to the Section at titled "**General Information**" on page 51 of this Prospectus.

65. Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application.

Pursuant to the SEBI ICDR Regulations, Investors other than retail (including non-institutional investors and Corporate Bodies) are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Amount) at any stage after submitting an Application. While our Company is required to complete Allotment pursuant to the issue within six Working Days from the Bid/ Issue Closing Date, events affecting the Applicants decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operation or financial condition, may arise between the date of submission of the Application and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events limit the applicant's ability to sell the Equity Shares Allotted pursuant to the issue or cause the trading price of the Equity Shares to decline on listing.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

500	24	500	16.67%
1,000	23	1,500	50.00%

GLOBAL ECONOMY

The global economy remains in a precarious state amid the protracted effects of the overlapping negative shocks of the pandemic, the Russian Federation's invasion of Ukraine, and the sharp tightening of monetary policy to contain high inflation. Global growth is projected to slow significantly in the second half of this year, with weakness continuing in 2024. Inflation pressures persist, and tight monetary policy is expected to weigh substantially on activity. Recent banking sector stress in advanced economies will also likely dampen activity through more restrictive credit conditions. The possibility of more widespread bank turmoil and tighter monetary policy could result in even weaker global growth. Rising borrowing costs in advanced economies could lead to financial dislocations in the more vulnerable emerging market and developing economies (EMDEs). In low-income countries, in particular, fiscal positions are increasingly precarious. Comprehensive policy action is needed at the global and national levels to foster macroeconomic and financial stability. Among many EMDEs, and especially in low-income countries, bolstering fiscal sustainability will require generating higher revenues, making spending more efficient, and improving debt management practices. Continued international cooperation is also necessary to tackle climate change, support populations affected by crises and hunger, and provide debt relief where needed. In the longer term, reversing a projected decline in EMDE potential growth will require reforms to bolster physical and human capital and labor-supply growth.

Regional prospects

Growth is projected to diverge across EMDE regions this year and next. It is expected to pick up in 2023 in East Asia and Pacific (EAP) and Europe and Central Asia (ECA), as China's reopening spurs a recovery and as growth prospects in several large economies improve. In contrast, growth is forecast to moderate in all other regions, particularly in Latin America and the Caribbean (LAC) and the Middle East and North Africa (MNA). Headwinds from weak external demand, tight global financial conditions, and high inflation will drag on activity this year, especially in LAC, South Asia (SAR), and Sub-Saharan Africa (SSA). The lingering impact of Russia's invasion of Ukraine will continue to weigh on growth across regions, particularly in ECA. Next year, growth is projected to moderate in EAP and SAR but to pick up elsewhere as domestic headwinds ease and external demand strengthens. Downside risks to the outlook for all regions include possible further global financial stress and more persistent domestic inflation than projected in the baseline. Geopolitical tensions, conflict and social unrest, and natural disasters stemming from climate change also present downside risks, to varying degrees. The materialization of such risks could further weaken potential growth, leading to a prolonged period of slower growth in all EMDE regions.

Investment growth after the pandemic

Investment growth in EMDEs is expected to remain below its average rate of the past two decades through the medium term. This subdued outlook follows a geographically widespread investment growth slowdown in the decade before the COVID-19 pandemic. During the past two decades, investment growth was associated with strong real output growth, robust real credit growth, terms of trade improvements, growth in capital inflows, and investment environment reform spurts. All of these factors have seen a declining trend since the 2007-09 global financial crisis. Weak investment growth is a concern because it dampens potential growth, is associated with weak trade, and makes achieving development and climate-related goals more difficult. Policies to boost investment growth need to be tailored to country circumstances but include comprehensive fiscal and structural reforms, including repurposing of expenditure on inefficient subsidies. Given EMDEs' limited fiscal space, the international community will need to significantly scale up international cooperation and official financing and grants as well as help leverage private sector financing for sufficient investment to materialize.

Global risks and policy challenges

An intensification of advanced-economy banking stress could result in a sharp slowdown in global growth in 2024, or even a global recession if it had major spillovers to emerging market and developing economies (EMDEs). A more hawkish U.S. monetary policy reaction to inflation could also further raise borrowing costs in EMDEs, especially in those with underlying vulnerabilities. There is an increasing need for debt relief for low-income countries amid a greater diversity of lenders. Substantial investments are needed to achieve resilient and low-carbon growth. Rising debt servicing costs are increasing the risk of debt distress. Reversing the decline in potential growth requires decisive structural reforms.

The global economy remains in a precarious state amid the protracted effects of the overlapping negative shocks of the pandemic, the Russian Federation’s invasion of Ukraine, and the sharp tightening of monetary policy to contain high inflation. The resilience that global economic activity exhibited earlier this year is expected to fade. Growth in several major economies was stronger than envisaged at the beginning of the year, with faster-than-expected economic reopening in China and resilient consumption in the United States. Nonetheless, for 2023 as a whole, global activity is projected to slow, with a pronounced deceleration in advanced economies and a sizable pickup in China (*figure A*). Inflation pressures persist, and the drag on growth from the ongoing monetary tightening to restore price stability is expected to peak in 2023 in many major economies. Recent banking sector stress will further tighten credit conditions. This will result in a substantial growth deceleration in the second half of this year. This slowdown will compound a period of already-subdued growth—over the first half of the 2020s (2020-2024), growth in EMDEs is expected to average just 3.4 percent, one of the weakest half-decades of the past 30 years (*figure B*). This slowdown reflects both cyclical dynamics and the current trend of declining global potential output growth (*figure C*).

Global financial conditions have tightened as a result of policy rate hikes and, to a lesser extent, recent bouts of financial instability. Many banks experienced substantial unrealized losses due to the sharp rise in policy interest rates. Concerns about the viability of balance sheets of some banks led to depositor flight and market volatility in the United States and Europe earlier in the year, which were stemmed by a swift and extensive policy response. Financial markets remain highly sensitive to evolving expectations about the future path of interest rates of major central banks. Spillovers from banking turmoil in advanced economies to EMDEs have so far been limited. However, countries with more pronounced macroeconomic policy vulnerabilities, as reflected by lower credit ratings, have experienced slower growth and greater financial stress, including large currency depreciations and a sharp widening of sovereign spreads. Projections for 2023 growth in these economies have fallen by more than half over the past year (*figure D*).

Inflation pressures persist. Although global headline inflation has been decelerating as a result of base effects, abating supply chain pressures, and falling commodity prices, core inflation in many countries remains elevated, and inflation is above target in almost all inflation-targeting economies. Inflation is expected to continue to be above its pre-pandemic level beyond 2024 (*figure E*). That said, inflation expectations in most inflation targeting countries have so far not undergone a major shift and appear to remain anchored.

Growth in advanced economies is set to decelerate substantially for 2023 as a whole, to 0.7 percent, and to remain feeble in 2024, due to monetary tightening, less favorable credit conditions, softening labor markets, and still-high energy prices. In EMDEs, aggregate growth is projected to edge up to 4 percent in 2023, almost entirely due to a rebound in China following the removal of strict pandemic-related mobility restrictions. Excluding China, growth in EMDEs is set to slow substantially to 2.9 percent this year. This projection is predicated on the assumption of a protracted period of tight global monetary policy, fiscal consolidation in most EMDEs, and weak external demand. The slowdown is expected to be even more severe for EMDEs with elevated fiscal vulnerabilities and external financing needs. Persistent weak growth means that, excluding China, EMDEs are expected to continue making next to no progress at closing the differential in per capita incomes relative to advanced economies (*figure F*). By 2024, economic activity in EMDEs will still be about 5 percent below levels projected on the eve of the pandemic.

Global risks and policy challenges

An intensification of advanced-economy banking stress could result in a sharp slowdown in global growth in 2024, or even a global recession if it had major spillovers to emerging market and developing economies (EMDEs). A more hawkish U.S. monetary policy reaction to inflation could also further raise borrowing costs in EMDEs, especially in those with underlying vulnerabilities. There is an increasing need for debt relief for low-income countries amid a greater diversity of lenders. Substantial investments are needed to achieve resilient and low-carbon growth. Rising debt servicing costs are increasing the risk of debt distress. Reversing the decline in potential growth requires decisive structural reforms.

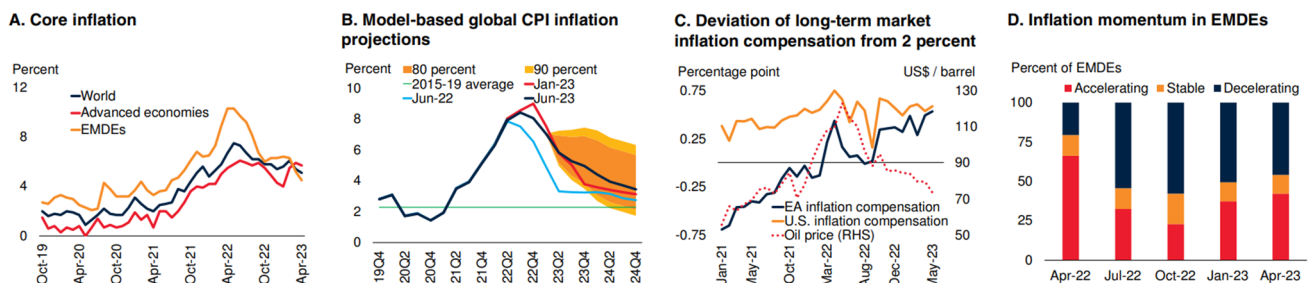

Global trade

Supply chain pressures and supplier delivery times have dropped back to pre-pandemic levels as goods demand has weakened and global shipping conditions have improved. A rising number of new trade measures have been protectionist. The ongoing shift in global consumption toward less trade-intensive goods will likely continue to lower the growth rate of trade relative to output. This shift and subdued demand are expected to dampen global trade growth substantially this year.

Global inflation

Global core inflation remains elevated. Projections suggest inflation will continue to be above its pre-pandemic level beyond 2024. Market-based measures of long-term inflation compensation in advanced economies remain above 2 percent, despite a decline in oil prices. In many emerging market and developing economies (EMDEs), inflation is either accelerating or has stabilized at high levels. One-year-ahead EMDE inflation expectations have declined only slightly. Longer-term projections point to a faster decline in inflation in countries with inflation targets.

INDIAN ECONOMY

In general, global economic shocks in the past were severe but spaced out in time. This changed in the third decade of this millennium. At least three shocks have hit the global economy since 2020. It all started with the pandemic-induced contraction of the global output, followed by the Russian-Ukraine conflict leading to a worldwide surge in inflation. Then, the central banks across economies led by the Federal Reserve responded with synchronised policy rate hikes to curb inflation.

The Indian economy, however, appears to have moved on after its encounter with the pandemic, staging a full recovery in FY22 ahead of many nations and positioning itself to ascend to the pre-pandemic growth path in FY23. Yet in the current year, India has also faced the challenge of reining in inflation that the European strife accentuated. Measures taken by the government and RBI, along with the easing of global commodity prices, have finally managed to bring retail inflation below the RBI upper tolerance target in November 2022. However, the challenge of the depreciating rupee, although better performing than most other currencies, persists with the likelihood of further increases in policy rates by the US Fed.

Despite these, agencies worldwide continue to project India as the fastest-growing major economy at 6.5-7.0 per cent in FY23. These optimistic growth forecasts stem in part from the resilience of the Indian economy seen in the rebound of private consumption

seamlessly replacing the export stimuli as the leading driver of growth. The uptick in private consumption has also given a boost to production activity resulting in an increase in capacity utilisation across sectors. The rebound in consumption was engineered by the near-universal vaccination coverage overseen by the government that brought people back to the streets to spend on contact-based services, such as restaurants, hotels, shopping malls, and cinemas, among others. The world's second-largest vaccination drive involving more than 2 billion doses also served to lift consumer sentiments that may prolong the rebound in consumption. Vaccinations have facilitated the return of migrant workers to cities to work in construction sites as the rebound in consumption spilled over into the housing market. This is evident in the housing market witnessing a significant decline in inventory overhang to 33 months in Q3 of FY23 from 42 months last year.

The Capital Expenditure (Capex) of the central government, which increased by 63.4 per cent in the first eight months of FY23, was another growth driver of the Indian economy in the current year, crowding in the private Capex since the January-March quarter of 2022. On current trend, it appears that the full year's capital expenditure budget will be met. A sustained increase in private Capex is also imminent with the strengthening of the balance sheets of the Corporates and the consequent increase in credit financing it has been able to generate. India's economic growth in FY23 has been principally led by private consumption and capital formation. It has helped generate employment as seen in the declining urban unemployment rate and in the faster net registration in Employee Provident Fund. Still, private capex soon needs to take up the leadership role to put job creation on a fast track. Recovery of MSMEs is proceeding apace, as is evident in the amounts of GST they pay, while the ECGLS is easing their debt servicing concerns.

Note: *Projection for India is for its fiscal year (Apr-Mar), while for the other economies, it is from Jan-Dec.

Global growth has been projected to decline in 2023 and is expected to remain generally subdued in the following years as well. The slowing demand will likely push down global commodity prices and improve India's CAD in FY24. However, a downside risk to the Current Account Balance stems from a swift recovery driven mainly by domestic demand and, to a lesser extent, by exports. Growth is expected to be brisk in FY24 as a vigorous credit disbursal, and capital investment cycle is expected to unfold in India with the strengthening of the balance sheets of the corporate and banking sectors.

Market Size

India's nominal gross domestic product (GDP) at current prices is estimated to be at ₹ 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy.

- As of September 21, 2022, India's foreign exchange reserves stood at US\$ 524,520 million.
- The private equity-venture capital (PE-VC) sector investments stood at US\$ 2 billion in September 2022.

- In September 2022, the gross Goods and Services Tax (GST) revenue collection stood at ₹ 147,686 crore (US\$ 17.92 billion).
- In August 2022, the overall IIP (Index of Industrial Production) stood at 131.3. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 99.6, 131.0 and 191.3, respectively, in August 2022.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 7.41% in September 2022.
- In FY 2022-23, (until October 28, 2022), Foreign Portfolio Investment (FPI) outflows stood at ₹ 58,762 crore (US\$ 7.13 billion).

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports.

- Home & Cooperation Minister Mr. Amit Shah, laid the foundation stone and performed Bhoomi Pujan of Shri Tanot Mandir Complex Project under Border Tourism Development Programme in Jaisalmer in September 2022.
- In August 2022, Mr. Narendra Singh Tomar, Minister of Agriculture and Farmers Welfare inaugurated four new facilities at the Central Arid Zone Research Institute (CAZRI), which has been rendering excellent services for more than 60 years under the Indian Council of Agricultural Research (ICAR).
- The Union Budget of 2022-23 was presented on February 1, 2022, by the Minister for Finance & Corporate Affairs, Ms. Nirmala Sitharaman. The budget had four priorities PM GatiShakti, Inclusive Development, Productivity Enhancement and Investment, and Financing of Investments. In the Union Budget 2022-23, effective capital expenditure is expected to increase by 27% at ₹ 10.68 lakh crore (US\$ 142.93 billion) to boost the economy. This will be 4.1% of the total Gross Domestic Production (GDP).
- In August 2022, a Special Food Processing Fund of ₹ 2,000 crore (US\$ 242.72 million) was set up with National Bank for Agriculture and Rural Development (NABARD) to provide affordable credit for investments in setting up Mega Food Parks (MFP) as well as processing units in the MFPs.
- In July 2022, Deendayal Port Authority (DPA) announced plans to develop two Mega Cargo Handling Terminals on a Build-Operate-Transfer (BOT) basis under Public-Private Partnership (PPP) Mode at an estimated cost of ₹ 5,963 crore (US\$ 747.64 million).
- In the Union Budget of 2022-23, the government announced a production linked incentive (PLI) scheme for Bulk Drugs which was an investment of ₹ 2500 crore (US\$ 334.60 million).
- In May 2021, the government approved the production linked incentive (PLI) scheme for manufacturing advanced chemistry cell (ACC) batteries at an estimated outlay of ₹ 18,100 crore (US\$ 2.44 billion); this move is expected to attract domestic and foreign investments worth ₹ 45,000 crore (US\$ 6.07 billion).
- The Government of India is expected to increase public health spending to 2.5% of the GDP by 2025.
- In July 2022, the Union Cabinet chaired by the Prime Minister Mr. Narendra Modi, approved the signing of the Memorandum of Understanding (MoU) between India & Maldives. This MoU will provide a platform to tap the benefits of information technology for court digitization and can be a potential growth area for the IT companies and start-ups in both the countries.

Growth Outlook: 2023-24

India's recovery from the pandemic was relatively quick, and growth in the upcoming year will be supported by solid domestic demand and a pickup in capital investment. The current growth trajectory will be supported by multiple structural changes that have been implemented over the past few years. The private sector – financial and non-financial – was repairing balance sheets, which led to a slowdown in capital formation in the previous decade. The financial system stress experienced in the second decade of the millennium, evidenced by rising nonperforming assets, low credit growth and declining growth rates of capital formation, caused by excessive lending witnessed in the first decade-plus, is now behind us. Aided by healthy financials, incipient signs of a new private sector capital formation cycle are visible. More importantly, compensating for the private sector's caution in capital expenditure, the government raised capital expenditure substantially. Budgeted capital expenditure rose 2.7X in the last seven years, from FY16 to FY23, re-invigorating the Capex cycle. Structural reforms such as the introduction of the Goods and Services Tax and the Insolvency and Bankruptcy Code enhanced the efficiency and transparency of the economy and ensured financial discipline and better compliance.

Growth Magnets in this Decade (2023-2030)

After a long period of balance sheet repair in the financial and corporate sector, the financial cycle is poised to turn upward. As the health and economic shocks of the pandemic and the spike in commodity prices in 2022 wear off, the Indian economy is thus well placed to grow at its potential in the coming decade, similar to the growth experience of the economy after 2003. This is the primary reason for expecting India's growth outlook to be better than it was in the pre-pandemic years. The sound and healthy financial system developed over the last few years will ensure efficient credit provisioning, contributing to higher growth in the coming years through higher investments and consumption. Thanks to India's digital revolution and formalisation, banks have far more information about their customer's credit risks than before, thus being able to make credit and pricing decisions better than before.

Road Ahead

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022-23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

INDUSTRY SCENARIO

Healthcare has become one of India's largest sectors, both in terms of revenue and employment. Healthcare comprises hospitals, medical devices, clinical trials, outsourcing, telemedicine, medical tourism, health insurance and medical equipment. The Indian healthcare sector is growing at a brisk pace due to its strengthening coverage, services, and increasing expenditure by public as well private players.

India's healthcare delivery system is categorized into two major components - public and private. The government, i.e. public healthcare system, comprises limited secondary and tertiary care institutions in key cities and focuses on providing basic healthcare facilities in the form of primary healthcare centres (PHCs) in rural areas. The private sector provides a majority of secondary, tertiary, and quaternary care institutions with a major concentration in metros, tier-I and tier-II cities.

India's competitive advantage lies in its large pool of well-trained medical professionals. India is also cost-competitive compared to its peers in Asia and western countries. The cost of surgery in India is about one-tenth of that in the US or Western Europe. The low cost of medical services has resulted in a rise in the country's medical tourism, attracting patients from across the world. Moreover, India has emerged as a hub for R&D activities for international players due to its relatively low cost of clinical research.

The Indian Council of Medical Research has issued the ICMR Code which envisages that medical and related research using human beings as research participants must only be carried out after due consideration of all alternatives and the use of human participants is considered to be essential for the proposed study. The ICMR Code lays down the requirement of ensuring privacy and confidentiality along with ensuring that such studies are conducted in a transparent and environmentally friendly manner.

As required by the ICMR Code, it is mandatory that all proposals on biomedical research involving human participants should be cleared by an appropriately constituted independent and impartial institutional ethics committee to safeguard the welfare and the rights of the participants. The committee should preferably have seven to 15 persons while maintaining a balance between medical and non-medical/ technical and non-technical members, depending upon the needs of the institution.

These ethics committees are entrusted with the initial review of research proposals prior to their initiation, and also have a continuing responsibility to regularly monitor the approved research to ensure ethical compliance during the conduct of research. Such an on-going review has to be in accordance with the international guidelines wherever applicable and the Standard Operating Procedures of the World Health Organization.

The ICMR Code also provides that the human participants may be paid for the inconvenience and time spent, and should be reimbursed for expenses incurred, in connection with their participation in the research. They may also receive free medical services.

During the period of research, if any such participant requires treatment for complaints other than the one being studied necessary, free ancillary care or appropriate treatments may be provided. However, the ethics committee is entrusted to ensure that payments should not be so large or the medical services so extensive as to make a prospective participant's consent readily to enroll in research against their better judgment, which would then be treated as undue inducement.

LAWS RELATING TO INTELLECTUAL PROPERTY RIGHTS

Intellectual Property Legislation

The Copyright Act, 1957 and the Copyright Rules, 2013, issued under the Copyright Act, 1957, protect literary and dramatic works, musical works, artistic works including photographs and audio visual works (cinematograph films and video). While copyright registration is not a prerequisite for acquiring or enforcing a copyright in an otherwise copyrightable work, registration constitutes prima facie evidence of the particulars entered therein and may expedite infringement proceedings and reduce delay caused due to evidentiary considerations. The Copyright Rules, 2013 lays down the procedure for registration of copyright, including artistic, musical and literary works. The Trade Marks Act, 1999 ("Trade Marks Act") provides for application and registration of trademarks in India. It also provides for exclusive rights to marks such as brand, label, and heading and to obtain relief in case of infringement for commercial purposes as a trade description. The Trade Marks Act prohibits registration of deceptively similar trademarks and provides penalties for infringement, falsifying or falsely applying trademarks.

Intellectual Property in India enjoys protection under both common law and statute. Under statute, India provides for patent protection under the Patents Act, 1970, copyright protection under the Copyright Act, 1957, trademark protection under the Trade Marks Act, 1999 and design protection under the Designs Act, 2000. The above enactments provide for protection of intellectual property by imposing civil and criminal liability for infringement.

The Trade Marks Act, 1999 (the "Trade Marks Act")

Indian trademark law permits the registration of trademarks for goods and services. The Trade Marks Act governs the statutory protection of trademarks and for the prevention of the use of fraudulent marks in India. Certification marks and collective marks can also be registered under the Trademarks Act. An application for trademark registration may be made by individual or joint applicants by any person claiming to be the proprietor of a trade mark, and can be made on the basis of either use or intention to use a trademark in the future. Applications for a trademark registration may be made for in one or more international classes. Once granted, trademark registration is valid for ten (10) years unless cancelled. If not renewed after ten (10) years, the mark lapses and the registration has to be restored. While both registered and unregistered trademarks are protected under Indian Law, the registration of trademarks offers significant advantages to the registered owner, particularly with respect to proving infringement.

The Trade Mark (Amendment) Act, 2010 has been enacted by the GoI to amend the Trade Marks Act in order to enable Indian nationals as well as foreign nationals to secure simultaneous protection of trademark in other countries, and to empower the Registrar of Trademarks to do so. It also seeks to simplify the law relating to transfer of ownership of trademarks by assignment or transmission and to bring the law generally in line with international practice.

Patents Act, 1970

The Patents Act, 1970 (the "Patents Act") governs the patent regime in India. Being a signatory to the Agreement on Trade Related Aspects of Intellectual Property Rights, India is required to recognise product patents as well as process patents. In addition to the broad requirement that an invention, a patent has to satisfy the requirements of novelty, utility and non-obviousness in order for it to avail patent protection. The Patents Act stipulates that patent protection may not be granted to certain specified types of inventions and materials even if they satisfy the above criteria. The Patents Act prohibits any person resident in India from applying for patent for an invention outside India without making an application for the invention in India. The term of a patent granted under the Patents Act is twenty (20) years from the date of filing of the application for the patent.

Phased implementation of Unified Payments Interface

SEBI has issued a circular bearing number SEBI/HO/CFD/DIL2/CIR/P/2018/138 dated November 1, 2018 and circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/50 dated April 3, 2019 circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/76 June 28, 2019, circular no. SEBI/HO/CFD/DIL2/CIR/P/2019/85 dated July 26, 2019 and circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 08, 2019 (collectively the “UPI Circulars”) in relation to streamlining the process of public issue of equity shares and convertibles. Pursuant to the UPI Circulars, UPI will be introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for applications by RIBs through intermediaries with the objective to reduce the time duration from public issue closure to listing from six working days to up to three

working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI Mechanism, the UPI Circular proposes to introduce and implement the UPI Mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Applicant had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIIs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuers will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Applicants into the UPI mechanism.

Illustration of the Book Building and Price Discovery Process: Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Issuer, in consultation with the BRLM, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 (“FEMA”). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India (“RBI”) and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”).

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2)/2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the “FDI Policy”), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

In terms of the FEMA NDI Rules, a person resident outside India may make investments into India, subject to certain terms and conditions, and provided that an entity of a country, which shares land border with India or the beneficial owner of an investment into India who is situated in or is a citizen of any such country, shall invest only with government approval.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country (“Restricted Investors”), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India. Each Bidder should seek independent legal advice about its ability to participate in the Offer. In the event such prior approval of the Government of India is required, and such approval has been obtained, the Bidder shall intimate our Company and the Registrar to the Offer in writing about such approval along with a copy thereof within the Issue Period.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue and in accordance with the extant FDI guidelines on sectoral caps, pricing guidelines etc. as amended by Reserve bank of India, from time to time.
